## Introduction

This appendix lists the available Codelists in order of Codelist number:

- The Technical Codes for which the values given here in the DDNEA Phase 2 are definitive.
- The Business Codes (those identified in the FESS) for which the definitive values are those loaded into the SEED are available for download to NAs. Therefore, the codes of the Business Codelists are not presented and only the list of Business Codelists is presented in the Section "List of Available Business Codelists" table. The codes of the Business Codelists are presented and maintained in the FESS Appendix B. The codes of the Technical Codelists are presented (refer to Section "Detail Description of the Technical Codelists") and the list of Technical Codelists is presented in the Section "List of Available Technical Codelists".

Each Codelist is structured as follows:

Number	Number used in DDNEA Appendix C Correlation tables.
Name	Name, in most cases resembling the name of the relevant attribute(s).
Format	Type of code and thus of the attributes to which the Codelist applies.
Details	Exceptions, relevant attributes.
Code	Values.
Description	Meaning of each value.
Remarks	Exceptions or remarks concerning a particular value.

DDNEA for EMCS Appendix D refers to the Business and Technical Codelists using the following format: "BC"n2 (for Business Codelists) and "TC"n2 (for Technical Codelists), e.g. BC01 for Codelist "Evidence Types".

Note that the codes included in Business Codelists will be maintained by the SEED.

Additional codes can be defined at national level in a separate National Codelist. These codes will only be used within the National and External Domains and NOT the Common Domain. Therefore they will be under the control of the National Helpdesk and will be communicated within that NA.
